

RATTLESNAKE AWARENESS MONTH

Rattlesnake bite is a veterinary emergency that results in serious injury or even death to thousands of dogs and horses each year. Rattlesnake venom is a complex mixture of toxins that spreads through an animal's body following the bite. Red Rock has developed vaccines to defend dogs from the dangerous effects of rattlesnake venom. That's rattlesnake protection that will put you and your dogs at ease.

**\$5.00 OFF RED ROCK RATTLESNAKE VACCINE!
